

Your Circulatory Highway

1 Femoral Artery

2 Popliteal Vein

3 Small Saphenous Vein

4 Tibialis Anterior Artery

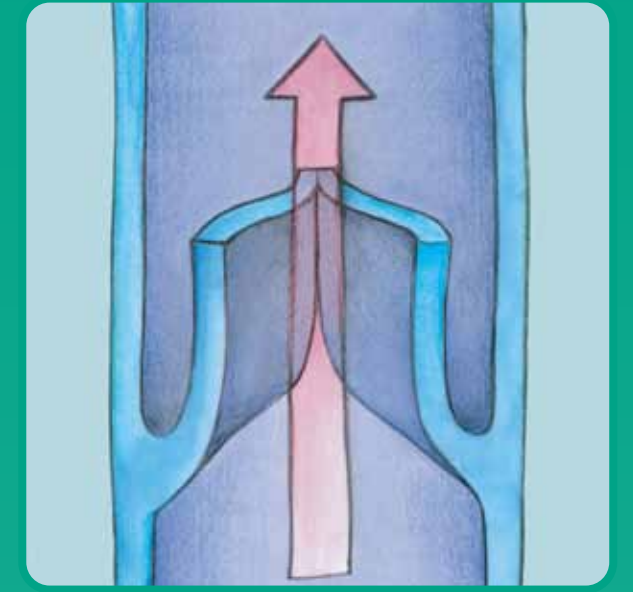

5 Tibialis Posterior Artery

6 External Iliac Vein

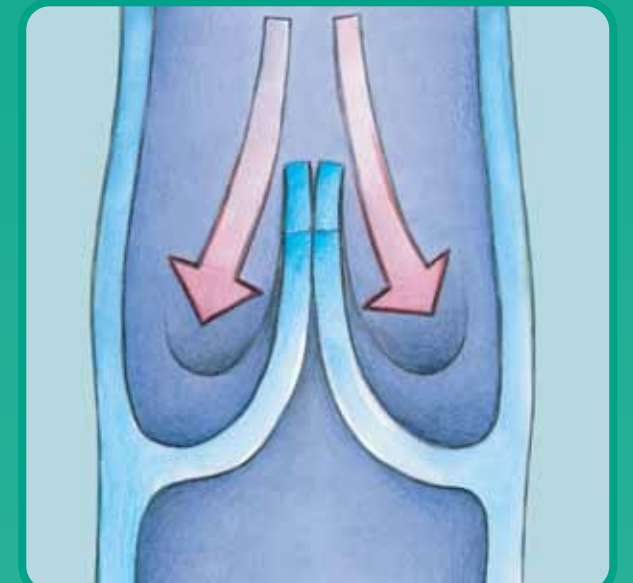

7 Femoral Vein

8 Great Saphenous Vein

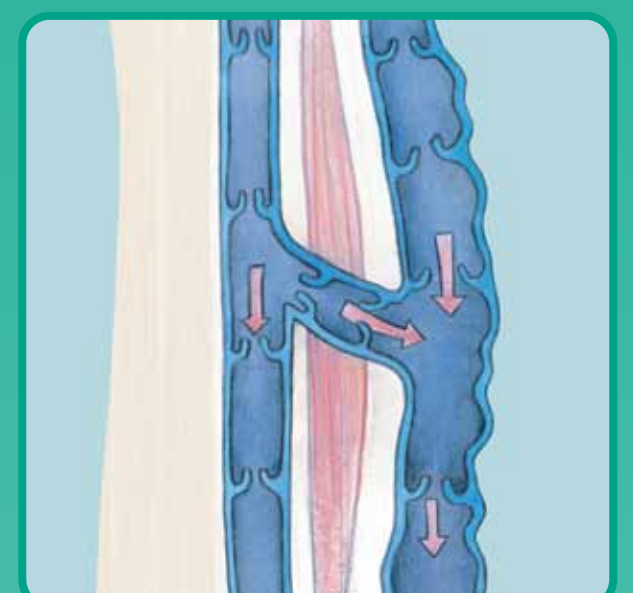

9 Perforators

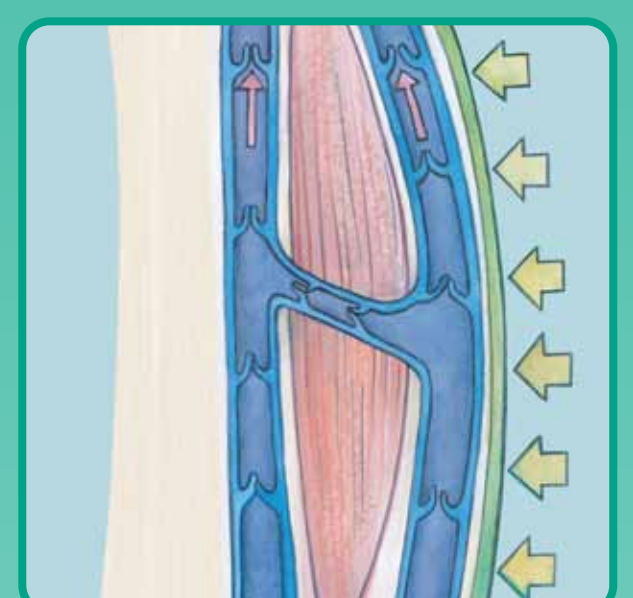

Venous valve open:
blood flows to the heart

Venous valve closed:
prevents back flow of blood

Vein walls are too weak
or the vein valves do not
open and close properly

A compression stocking
provides external support
to the vein wall
